

MTSS-mba Tracking & Administration Software for Taft-Hartley Membership & Employee Benefit Funds

*Talbot Business Solutions, LLC, a premier software solutions provider, announced today the release of the **Web Information Access Portal (WIAP)** for its Membership and Benefit Fund Administration software product, MTSS-mba.*

PR Log (Press Release) – Jan 17, 2010 – GAITHERSBURG, MD. – Talbot Business Solutions, LLC, a premier software solutions provider, announced today the release of the Web Information Access Portal (WIAP) for its Membership and Benefit Fund Administration software product, MTSS-mba.

MTSS-mba is a custom-tailored software product for tracking and administering membership and benefit fund information, serving private and the Taft-Hartley multi-employer benefit fund industry.

The formal release of the WIAP module comes on the heels of overwhelming interest and enthusiastic reviews of the pre-release information shared at the IFEBP 55th annual conference in Orlando. The WIAP module adds a HIPAA compliant, secure web access capability layer to the MTSS-mba system allowing other MTSS-mba modules to share their data with the outside world. This new feature enables administrators to offer members easy, yet secure, access to their union membership and benefit fund information through a web browser.

Information available to the outside and the security required to permit access, are defined by the administrator. Membership data might include SSN, DOB, name and addresses, marriage status, benefit eligibility, benefit payments history, employment status for example while non-membership groups such as employers, could access totally different information.

MTSS-mba began as a custom developed software application in 1991. It was designed to track and administer membership and membership benefit fund data for membership based organizations and entities such as Health and Welfare or Legal Services Funds. The recent release of MTSS-mba –Membership and Benefits Administration Software, now represents the cumulative result of considerable effort and careful study of current private and Taft-Hartley multi-employer, employee benefit administrator's informational and data processing requirements.

Since its inception and introduction to the market place, the feature set of MTSS-mba has continued to expand. These features now include reporting and calculating dues, benefits eligibility, payments, payment shortages, document imaging, member and benefit statistics, automatic downloading of employer and membership data, benefit provider reconciliation, eligibility and benefit experience costing, and most recently, web access; all of which reflect a mature product's evolution, responding to industry changes and user requests.

Every MTSS-mba module and feature has been designed for user friendliness and user tested to ensure it is providing the desired information. MTSS-mba modules are seamlessly interwoven and result in a cohesive, intuitive application that runs smoothly, fast, and fits each user's needs to a 'T'. MTSS-mba is easy to maintain and designed to be contention free; even for hundreds of simultaneous users - so 'nobody has to wait'. Data is quickly and easily retrieved at your desktop; right where you need it.

Users have noted that MTSS-mba has allowed them to immediately:

- * Reduce the time required to keep data up to date
- * Reduce the mistakes and errors in their data
- * Reduce underpayments for benefits
- * Reduce invalid charges from benefit providers for terminated coverage
- * Locate accurate information faster and easier than ever before
- * Identify and collect missing payments and contributions
- * Provide immediate notification to benefit providers of terminated coverages
- * Identify and obtain reimbursement for invalid charges from benefit providers
- * Easily generate mailing lists from membership data
- * Generate and track notices such as COBRA or school enrollment forms
- * Scan and retrieve document images

Simply put, MTSS-mba was "Designed to make you a Hero !"
