

MTSS-mba Tracking & Administration Software to attend the IFEBP 56TH Annual Conference

Talbot Business Solutions, LLC, a premier software solutions provider, announced today their participation in the International Foundation of Employee Benefit Plans 56th Annual Conference in Honolulu, Hawaii being held November 14th through November 17th, in Booth #1210

October 28, 2010 – Gaithersburg MD - Talbot Business Solutions, LLC, a premier software solutions provider, announced their participation in the International Foundation of Employee Benefit Plans 56th Annual Conference in Honolulu, Hawaii being held November 14th through November 17th, in Booth #1210

This year's conference will allow current and future customers to observe live demonstrations, how each MTSS-mba module and feature has been designed for user friendliness and user tested to ensure it is providing the desired information. MTSS-mba modules are seamlessly interwoven and result in a cohesive, intuitive application that runs smoothly, fast, and fits each user's needs to a "T". MTSS-mba is easy to maintain and designed to be contention free; even for hundreds of simultaneous users - so 'nobody has to wait'. Data is quickly and easily retrieved at your desktop; right where you need it

MTSS-mba began as a custom developed software application in 1991 and was designed to track and administer membership, and membership benefit fund data, for membership based organizations having benefit fund entities.

MTSS-mba has matured to a tremendously robust, custom-tailored software product serving the private and Taft-Hartley multi-employer, benefit fund industry and those entities tasked with maintaining health and welfare, legal services, pension and other benefit trust funds. MTSS-mba also tracks and maintains non-benefits related information such as dues, PAC, employment data, dependent data, etc.

The feature set of MTSS-mba has continued to expand. These features include reporting and calculating dues, benefits eligibility, payments, payment shortages, document imaging, member and benefit statistics as well as automated downloading and posting of employer and membership data, benefit provider reconciliation, eligibility and benefit experience costing, pension remittance and vesting processing, and web access; all of which reflect a mature product's evolution, responding to industry changes and user requests.

Simply put, MTSS-mba was "Designed to make you a Hero!" To learn more about MTSS-mba visit:
