FOR IMMEDIATE RELEASE

MTSS-mba Membership Benefits Administration Software for Private and Taft-Hartley Employee Benefit Funds

Talbot Business Solutions, LLC, a premier software solutions provider, announced today the March 2012 update release for its Employee Benefits Administration Software product, MTSS-mba.

March 3, 2012 – Gaithersburg, MD – Talbot Business Solutions, LLC, a premier software solutions provider, announced today the March 2012 update release for its Membership & Employee Benefit Administration software product, MTSS-mba.

MTSS-mba is a custom-tailored software product for tracking and administering membership and employee benefit fund information, serving private and the Taft-Hartley multi-employer benefit fund industry.

The formal release of the March 2012 update incorporates many enhancements to the MTSS-mba general release product. It specifically targets the areas of ad-hoc searches and custom reporting but also includes various other improvements as well. The enhancements included in the general release product will also find their way into the TPA versions of MTSS-mba in the coming months.

Many of the enhancements for this release were available and shown in the pre-release demo at the 57th Annual IFEBP conference in New Orleans. Demo participants showed great interest and enthusiasm when seeing the speed and ease with which data could be located and extracted using the newest feature sets.

Over 20 years of feedback from industry users has made the MTSS-mba product a mature, feature-rich and powerful solution that efficiently manages benefit fund data for Health and Welfare, Legal Services, Pension and other employee benefit programs with ease. MTSS-mba offers a customizable, modular design that affords seamless integration to accommodate any work-flow environment -- from the simplest single fund entity to the most complicated multi-fund, multi-entity organization.

From the automated intake and posting of employer data all the way through calculating and reporting eligibilities, contribution rates, payments and shortages, your data is carefully managed by MTSS-mba. Normally difficult tasks such as reconciling benefit provider charges to eligibility lists, calculating benefit experience costing or pension vesting, are all made incredibly easy. MTSS-mba even incorporates its own document imaging to provide immediate visual verification of source data.

MTSS-mba enables benefit administrators to conserve resources, reduce expenses and increase revenues, and turn benefits administration into a profit center!

About Talbot Business Solutions, LLC

Talbot Business Solutions was founded in Gaithersburg, Maryland in 2009 with the goal of bringing the absolute best management software solutions, and the highest customer service, to the Employee Benefits industry.
