**FOR IMMEDIATE RELEASE**

## **MTSS-mba Membership Benefits Administration Software for Private and Taft-Hartley Employee Benefit Funds Offers Expanded Custom Reports Module**

**Feb 20, 2013 – Gaithersburg, MD** – Talbot Business Solutions, LLC, a premier software solutions provider, announced today the release of a new Custom Reports Module for its Employee Benefits Administration software product, MTSS-mba.

The new module offers many new and expanded reporting features including a flexible report layout manager, a host of post-report generation filter and refinement options, and finally, a report integrated drill-down facility. Now report columns can be moved and placed anywhere on the report landscape. Output can be refined by adding custom filters and special sorting as needed. The report can be created, run, or saved as a template in the Report Library to be used over and over again.

With the new report integrated drill-down feature, researching the data behind the reports can now be performed directly from the report detail lines on screen. Simply click the report detail item and drill down to reveal the underlying data. Report research has never been easier.

The new features will be available in the general release of MTSS-mba by the end of February. The TPA versions will include the updates by the end of April.

MTSS-mba is a mature, feature-rich and powerful enterprise solution that efficiently manages data for Health and Welfare, Pension, Legal Services and other employee benefit programs. Difficult tasks such as research and data verification, are greatly streamlined by the integrated document imaging system which provides instant visual access to scanned source documents.

MTSS-mba has a customizable, modular design that affords seamless integration to accommodate any work-flow environment -- from the simplest single fund entity to the most complicated multi-fund, multi-entity organization having hundreds of thousands of benefit participants.

MTSS-mba enables benefit administrators to easily manage their data - AND - conserve resources by reducing expenses and increasing revenue collections.

###
