**FOR IMMEDIATE RELEASE**

## **MTSS-mba Membership Benefits Administration Software for Private and Taft-Hartley Employee Benefit Funds Offers New H&W Plan Analysis Module**

**Jun 20, 2016 – Gaithersburg, MD** – Talbot Business Solutions, LLC, a premier software solutions provider, announced today the release of the H&W Plan Analysis Module (HPA) for its cloud based Employee Benefits Administration software product, MTSS-mba.

The new Health & Welfare research tool allows analysis of H&W plan participation and distribution among subscriber population. Now it is possible to see at a glance the numbers and demographics of covered individuals or families, by plan or plan category or plan groups, or across all offered plans.

Plan utilization data can be quickly evaluated against other offered plans. The clear presentation of data is designed to quickly bring attention to coverage anomalies - demographic or otherwise. Data drill down is supported all the way to the individual subscriber record level to facilitate ease of research.

Using the MTSS-mba HPA module, H&W plans can be easily ranked according to usage popularity and demographics, providing valuable information to the decision making process regarding future plan designs and offerings.

The new H&W Plan Analysis module is available now, for both general release and TPA versions, and can be easily added to existing MTSS-mba installations.

MTSS-mba is a mature, cloud based, feature-rich and powerful enterprise solution that efficiently manages membership and eligibility data for various types of benefit programs including Health and Welfare, Pension, Legal Services and others. Difficult research tasks such as data verification, are greatly streamlined by the integrated document imaging system which provides instant visual access to scanned source documents.

MTSS-mba has a customizable, modular design that affords seamless integration into almost any work-flow environment. Configurations range from the simplest single fund, to the most complicated multi-fund, multi-entity organization, hosting hundreds of thousands of benefit participants.

MTSS-mba enables benefit administrators to easily manage their data - AND - conserve resources by reducing expenses and increasing revenue collections.

Call us today to see how MTSS-mba can help you.
