FOR IMMEDIATE RELEASE

MTSS-mba Membership Benefits Administration Cloud App For Private & Taft-Hartley Employee Funds Announces "Eligibility For Next To Nothing" Program

Oct 05, 2016 – **Gaithersburg, MD** –Talbot Business Solutions, LLC, a premier software solutions provider, today announced its "Eligibility For Next To Nothing" campaign featuring new entry level programs with incentives and competitive upgrade pricing for its cloud based Employee Benefits Administration software product, MTSS-mba.

The new entry level product offerings are intended to be especially attractive to smaller benefit funds that may desire to bring the eligibility process in-house but have been unable to because of associated costs. These new programs are designed to be very easy to implement and provide the immediate benefits of having a powerful tool such as MTSS-mba available at an incredibly low price.

As part of the campaign, users of other products are being offered competitive upgrade incentives for making the switch to MTSS-mba.

Included with this release are several new conversion and transition tools that help manage the initial data load, effectively streamlining the process and reducing installation time and costs.

MTSS-mba will be on display at the 2016 IFEBP 62nd Annual Employee Benefits Conference in Orlando, Florida this November where several other new and exciting offerings will be announced. Support staff, engineers and technicians will be present to answer questions and to provide demos. Trustees, Fund administrators and other potential users are encouraged to call now to secure one of the allotted time-slots (Nov 13,14 and 15 only) for a complete walk-through of the MTSS-mba capabilities.

MTSS-mba is a mature, cloud based, feature-rich and powerful enterprise solution that efficiently manages membership and eligibility data for benefit programs such as Health and Welfare, Pension, Legal Services and more. Data verification is greatly streamlined by the integrated document imaging system which provides instant visual access to scanned source documents.

MTSS-mba seamlessly integrates into almost any work-flow environment from a simple single fund entity to a multi-fund, multi-entity organization, hosting up to hundreds of thousands of participants.

MTSS-mba enables benefit administrators to easily manage their data - AND - conserve resources by reducing expenses and increasing revenue collections.

Call us today to see how MTSS-mba can help you.
